

The Hellermann Cable Strapping System presents Electrical Engineers with one of the most inexpensive and effective cable fastening methods yet devised. It features:-

- ★ Simple quick fitting.
- ★ Neat *permanent* wiring which can be opened and fastened again to permit modifications to the Cable Loom.
- ★ Standard Materials offering a 'do-it-yourself' system that can tackle *any* size of loom.
- ★ Recommended Temperature ranges (ambient)

Nylon	—65°C to +110°C
Helvin (PVC)	—65°C to +85°C

## HELLERMANN CABLE STRAPPING SYSTEM

The essential requirements for any successful Cable Strapping are an inherent property in the selected materials that will provide everlasting elastic tension and the continuous firmness of the strapping in service. The need is for loom to be as reliably and securely held after five years as after five minutes.

Two materials are available: Nylon and Helvin® Grade 220 (PVC).

All PVC materials suffer from a tendency towards permanent set, a condition brought on by the poor 'memory' of PVC which causes it to lose its elastic performance after a period of time. Grade 220 has been developed to reduce this effect to a minimum and the result is an improved Cable Strapping that gives outstanding performance at reasonable cost.

### C.E.G.B. Type Approval No. 13

#### Studs

As listed in S.S.M.(L)7-34 and S.D.M.(A)288.

#### Strapping

As listed in S.S.M.(L)18-6.

Stud for  $\frac{5}{16}$ " Cable Strapping. Black or Transparent

### F3 Fitting Tool

The F3 fitting tool has been designed to assist the speedy application of Cable Strapping under varying conditions. The use of this tool is not essential, but for mass production work or for fitting in confined areas it simplifies and speeds up fitting and at the same time enables a tighter binding to be obtained.

F3 Fitting Tool

**HELLERMANN ELECTRIC**  
CRAWLEY SUSSEX ENGLAND

A division of  
Bowthorpe-Hellermann Ltd

Tel: CRAWLEY 28888 Telex: 87163 (Prefix message HELEC) Cables: HELLERMANN, CRAWLEY

6" (152.4 mm) high  $\times$  4 $\frac{1}{2}$ " (114.3 mm) wide

The Hellermann Universal Sleeve Fitting Tool has interchangeable prongs and provides you with **3 tools in one**. Robustly constructed and beautifully finished this tool will stand up to the wear and tear that a tool in constant use will receive. With each tool, or body of each tool, in the Type D Tool Kit, you get 1 set of 'DS' prongs, (for sleeves 3.0 to 5.5 mm i.d.), 1 set of 'DK' prongs (for sleeves 5.5 to 11.5 mm i.d.), and 1 set of 'DG' prongs (for sleeves 11.5 mm i.d. upwards), to cover all the work that you may be called upon to do, and in the Type DSS tool Kit you get 2 sets of 'DSS' prongs (for sleeves 1.2 to 3.0 mm i.d.), and 1 set of 'DS' prongs.

**Reduced weight.** The saving in weight is as much as half the weight of similar tools enabling operators to work for longer periods with less fatigue.

## HELLERMANN UNIVERSAL SLEEVE FITTING TOOL KIT—TYPE D

When ordering please specify: Hellermann Type D Tool Kit or Hellermann Type DSS Tool Kit

**Improved Styling.** This new tool caters for the varying sizes of your operators' hands. The sweep of the handles enables them to grip where it suits them best.

**Reduced Pressure.** Because of the improved styling and design of the tool less pressure is required to open sleeves and no effort is wasted because the opening of the tool is adjustable too.

**No wasted effort.** Incorporated in the tool are 3 stop positions to control the opening of the sleeve—select the one required and cut out wasted effort in opening a sleeve far wider than is really necessary.

**A high standard of finish.** Not only is the Universal Sleeve Fitting Tool a tool that has introduced ease and precision into sleeve fitting but it is also a tool that will improve your production and help you to reduce costs. To complete the kits an Allen Key (for changing the prongs) and a small bottle of Hellerine Grade M lubricant is supplied.

# HELLERMANN

## SLEEVE FITTING TOOLS

Robustly constructed, these tools enable Hellermann Sleeves to be fitted easily and quickly with the least possible effort.

## WIRING TOOLS

### H35 WIRE STRIPPER

STANDARD MODEL Cat. Nos. H35/1-2-3

Strips wire clean up to  $\frac{7}{8}$ " (22.23 mm) long. Automatic device holds jaws open without crushing. Practically eliminates all nicking, cutting or fraying. Especially good for production stripping of lighter gauge wires, automotive wiring, radio and instrument wire and cable, telephone wiring. Blades easily changed. See table below.

DE-LUXE MODEL Cat. Nos. H35/7-8-9

Unique blade construction and extreme holding power of broad jaws permit fast accurate stripping without nicking or scraping wire and without marking insulation. Weight 14 oz. (397 gm). Extended leg on upper cutting blade ensures blade alignment thus obviating reduction in cutting diameter. Body—Robust die cast aluminium. Cutting Blades—High quality hardened and cast steel.

### H21C WIRE STRIPPER AND WIRE CUTTER

For removing insulation from cable ends without damaging conductor. Adjustable to accept conductors up to  $\frac{5}{32}$ " (3.97 mm) o.d. Also wire cutter without adjusting wire stripping setting. Opening spring facilitates action. P.V.C. covered handles.

### H66 GRIP SNIPS

An ideal tool for use in order to avoid the risk of cut ends of wire falling or flying into electronic work in the vicinity of the work area. As covered by Min. of Aviation Publication Av.P.89, 1st Issue, July 1966. Strands are gripped by a rubber sleeved spring in the jaws until the tool handles are opened.

Hellermann 'P' Clips provide one of the simplest means of fixing cables and pipe lines available today.

Four types of 'P' Clips are available and provide a range suitable for use in most applications.

## HELLERMANN 'P' CLIPS

CODE BIW/Sc

### SERIES AS3180

For fixing cables and pipelines. These clips, made of aluminium, are covered with Helsyn polychloroprene of extreme flame retardancy to meet War Office Specification No. TS359.

They provide a firm support, giving protection from vibration and chafing, according to the requirement of S.B.A.C. Drawing AS3180 and S.D.M.(A) 265.

This clip should not be used at temperatures above 100°C.

CODE BIW/Ss

### SERIES C8031

This general purpose 'P' clip is recommended for applications where conditions of performance are less stringent than those pertaining to aircraft. The covering (coloured grey) is a highly resilient grade of synthetic rubber, providing good cushioning. For use at temperatures not in excess of 80°C.

# HELLERMANN 'P' CLIPS continued

## SERIES HT0813

This series of 'P' clips is designed for use at temperatures up to 150°C for limited periods. The clips are covered with Helsyn 150, a high temperature grade of modified nitrile which is impervious to ester-based lubricants, paraffin, petrol and most hydraulic fluids. HT0813 clips are coloured white for easy identification.

Standard Pack: 100

CODE BIW/Ss

## SERIES HTX1380

For use at temperatures up to 200°C continuous, (250°C short periods). The clips are covered with Helsyn 200 hexafluoro propylene/vinylidene fluoride.
