

Chapter 3 INTEGRATED FLIGHT INSTRUMENT AND CONTROL SYSTEM

General

Due to the complexity of the integrated flight instrument and control system and in order to present the information in a readily understandable form, this chapter has been divided into a number of sub-chapters. Each of these is complete in itself, dealing with one particular aspect of the integrated system. Chapter 3A - General information, contains location diagrams, tables of fuses and equipment, and an interconnection diagram covering the integrated system. Each of the other sub-chapters includes descriptive text and diagrams and a set of routing diagrams covering its particular system. The various sub-chapters described are:-

- 3A General information
- 3B Air data system
- 3C Dynamic flight reference system
- 3D Flight control system
