

NOTE TO READERS

The subject matter of this publication may be affected by Servicing Schedules or "General Orders and Modifications" leaflets in this A.P., in the associated publications listed below, or even in some others. If possible, Amendment Lists are issued to correct this publication accordingly, but it is not always practicable to do so. When a Servicing Schedule or leaflet contradicts any portion of this publication, the Servicing Schedule or leaflet is to be taken as the overriding authority. ►

The inclusion of references to items of equipment does not constitute authority for demanding the items.

Each leaf, except the original issue of preliminaries, bears the date of issue and the number of the Amendment List with which it was issued. New or amended technical matter will be indicated by

triangles, positioned in the text thus: ◀-----▶ to show the extent of amended text, and thus: ▶◀ to show where text has been deleted. When a Part, Section, or Chapter is issued in a completely revised form, this is indicated under the title and the triangles do not appear.

The reference number of this publication was altered from A.P. 4744, Vol. 6 to A.P. 101B-1200-6 in November, 1966. No general revision of page captions has been undertaken, but the Code number appears in place of the earlier A.P. reference on new or amended leaves issued subsequent to that date.

This Publication is issued in three separate Covers, namely:- Cover 1, Cover 1A and Cover 2. If more than one copy of this publication is held, each set of covers should be given an identifying number and kept together.
