## NOTE TO READERS

The subject matter of this publication may be affected by Servicing Schedules or "General Orders and Modifications" leaflets in this AP, in the associated publications listed below, or even in some others. If possible, Amendment Lists are issued to correct this publication accordingly, but it is not always practicable to do so. When a Servicing Schedule or leaflet contradicts any portion of this publication, the Servicing Schedule or leaflet is to be taken as the overriding authority.

The inclusion of references to items of equipment does not constitute authority for demanding the items.

The reference number of this publication was altered from AP 4744, Vol.6 to AP 101B-1200-6 in November, 1966. No general revision of page captions has been undertaken, but the Code number appears in place of the earlier AP reference on new or amended leaves issued subsequent to that date.

This Publication is issued in three separate Covers, namely:- Cover 1, Cover 1A and Cover 2. If more than one copy of this publication is held, each set of covers should be given an identifying number and kept together. A detailed breakdown of Volume 6 is indicated in Cover 1.

Each leaf, except the original issue of preliminaries, bears the date of issue and the number of the Amendment List with which it was issued. Prior to 'Amdt 55' new or amended technical matter was indicated by triangles, positioned in the text thus:- ◀ ----- ▶ to show the extent of amended text, and thus:- ▶ ◀ to show where text has been deleted. With effect from 'Amdt 55' new or amended technical matter will be indicated thus:- ▶ ----- ◀. When a Part, Section, or Chapter is issued in a completely revised form, this is indicated under the title and the triangles do not appear.
