## NOTE TO READERS

The subject matter of this publication may be affected by Defence Council Instructions, Servicing Schedules or 'General Orders and Modifications' leaflets in this AP, in the associated publications listed below, or even in some others. If possible, Amendment Lists are issued to correct this publication accordingly, but it is not always practicable to do so. When a Schedule Instruction or leaflet contradicts any portion of this publication, the Schedule Instruction or leaflet is to be taken as the overriding authority.

The inclusion of references to items of equipment does not constitute authority for demanding the items.

Each leaf, except the original issue of preliminaries, bears the date of issue and the number of Amendment List with which it was issued. New or amended technical matter on new leaves which are inserted when the publication is amended will be indicated by triangles, positioned in the text thus ◀.....▶ to show the extent of amended text, and thus ▶◀ to show where text has been deleted. When a Section or Chapter is issued in a completely revised form the triangles will not appear.

This publication is now unclassified: new or revised leaves will not carry a security marking. AL 20 called for all security markings to be deleted from pages already issued. Holders should take this action as soon as reasonably possible, and in any event before this publication or any part of it is disposed of as waste.

The number of this AP was changed from AP 4617B Vol.1 and 6 to AP 102F-0203-16A, by AL 20, Nov.1971. No general revision of page captions has been undertaken, but the new code number appears in place of the earlier AP number on new or amended leaves.
