Aspec Systems Limited offers an integrated service covering the provision of a complete range of survival and personal protective equipment for the crew and passengers of all types of civil and military aircraft. This service includes the design, development and production of routine and post-decompression breathing systems, anti-g and personal conditioning equipment, telecommunications apparatus, post-ejection and post-descent survival aids and ground conditioning equipment for aircraft and aircrew. A full range of test equipment is also available.

**A combination
of experience and
technical achievement**
