

OXYGEN MASKS

HIGH ALTITUDE OXYGEN MASKS

The Catalyst Division of MSA manufacture a wide range of high altitude oxygen masks for flight crews of military aircraft. Advanced manufacturing techniques and high quality have resulted in MSA being one of the main suppliers of this vital life support product to the United Kingdom Ministry of Defence.

Quality and reliability are considered by MSA to be of paramount importance throughout the extensive product range. All MSA oxygen masks undergo stringent quality control procedures and final testing under simulated flight conditions prior to release from the factory.
