RETAIN THIS LETTER OF TRANSMITTAL — CHECK THAT ALL PREVIOUS TRANSMITTALS HAVE BEEN INCORPORATED —
 if any have not been received please advise Technical Publications Department, Rolls-Royce Limited, Derby, England

MEMORANDUM OF INSTRUCTIONS

1. CONTENTS. This schedule contains a complete list of Parts embodied in the AVON 30200 SERIES. Engine Change Unit.

2. MULTI-INDENTATION SYSTEM. The parts in the schedule are arranged in alphabetical order and items are indented to show their correct relationship to each other. The following is a key diagram of the layout as used throughout the body of this schedule:-

1 2 3 4 5
MAIN ASSEMBLY
 details of main assembly

 SUB ASSEMBLY
 details of sub assembly

 SUB SUB ASSEMBLY
 details of sub sub assembly

 SUB SUB SUB ASSEMBLY
 details of sub sub sub assembly

PARTS NOT INCLUDED IN MAIN ASSEMBLY

3. MR AND C/S COLUMN. (FOR R.A.F. USE ONLY) Items indicated M/ are required for Major Repair purposes only and will not normally be held in stock by Units other than those carrying out major repair work. A, B or C indicates class of store.

4. NUMBER OFF COLUMN. The number off shown against an Assembly or detail Part indicates the quantity required in the position shown and does not preclude the recurrence of the Assembly or detail Part in other positions in the complete major Assembly. In order to assess whether or not the Part recurs, reference should be made to the Reference/Part Number Index which quotes all pages where the Part/Assembly appears.

5. REF NO COLUMN. This schedule is being amended in stages to cover the conversion of domestic Stores Ref Nos to NATO Stock Nos. In future Amendment Lists only the Reference Number and Part Number indices will be fully amended, and the pages of text embodying items affected by retrospective coding or modification action will be re-issued with the Ref No column left blank. Therefore where blank Ref No columns appear in the spares breakdown of this Schedule the Part Number index should be referred to for the appropriate Stores Reference/Stock Number of any item required.

6. 'DEMANDS'

The demand must quote the appropriate Vocabulary Section and Reference/Stock Number for each item. Unreferenced parts are not normally provisioned as spares and demands for such items must quote the Vocabulary Section, Maker's Part Number, and the name and type of the equipment. The location of each part within the equipment should be clearly indicated. Demands are to be prepared in accordance with the procedure laid down in AP830 Volume 1 or BR4.

NOTE: The Vocabulary Sections and Reference Numbers applicable to this Schedule are subject to change by reason of retrospective NATO codification action - SEE PARA NO '5' ABOVE BEFORE DEMANDING ITEMS.

7. ESTABLISHMENT. The normal establishment of spares to be maintained is to be in accordance with the procedure laid down in Air Publication 830, Vol.1 or A.P.(N) 5.

8. OBSOLESCENT STOCK. An asterisk placed against a part or Assembly indicates that further purchases to that design will not be made but existing stocks are to be used until stocks are exhausted.

9. AMENDMENTS. Amendments to this Schedule will be published as and when necessary. Amendment Lists will be numbered consecutively, and the Commanding Officer will give the necessary instructions for the upkeep of the Schedule and completion of the Amendment Certificate.

A summary of all Amendment Lists distributed will be published in Air Ministry and/or Admiralty fleet Orders.

10. MODIFICATIONS. Modifications incorporated in this Schedule are indicated on the Modification Record Sheet.
