

NATO plugs & sockets

NATO-certified plugs & *sockets* for use in military civil aircraft communications and other applications

The TestWorks Group **four-way 671 plugs** and **626 sockets** have for many years formed part of the standard communications plug-in headsets used widely in military civil aircraft. They have also proved extremely popular with radio operators, the police and fire services.

These **plug and socket combinations** have been designed to **Ministry of Defence standards** and are available with **NATO codification**.

The robust and sturdy **plugs and sockets** have stood the test of time, and continue to provide proven reliability over numerous insertions throughout life. The **671 plugs** and **626 sockets** are supplied with a black cover as standard, and can also be provided for panel mounting if required.

Got a **question**? Need a **quote**? Get in touch.

Our team of experts are available to answer your questions and provide guidance on how we might help you tackle your project.
