AIR RADAR								
1. <u>Preparation</u> (Contd)								
Sub-item 1.6 is applicable only to Mk T5 aircraft.								
1.6 MUM meter unit. Place on starboard seat.								
1.7 Radar test harness.								
(a) Suspension strap and clip. Set clip to appropriate notch for aircraft concerned and attach to port edge of cockpit ensuring rubber pad on junction box rests against aircraft skin.								
(b) Cableforms.								
(i) Disconnect hand controller and connect 6-way free socket to cableform 6-way plug.								
(ii) Connect cableform 6-way socket to controller plug.								
(iii) Connect remaining cableforms to appropriate test points.								
NAV INSTRUMENTS								
2. <u>Preparation</u>								
2.1 MRG simulator.								
(i) Connect in place of MRG.								
(ii) Set pitch, roll and azimuth controls to zero.								
AIR RADAR								
3. <u>Preparation</u>								
3.1 Tester noise S-band.								
(a) Tuning control. Set to frequency of external receiver.								
(b) Main On/Off switch. ) Set to 'ON'.								
(c) RF Osc On/Off switch. ) Note: Indication lights will only illuminate after 4 minutes radar run up.								
Sub-item 3.2 is applicable only to Mk T5 aircraft.								
3.2 Pupil/Instructor switch. Set to 'PUPIL'.
