

RESTRICTED

A.P. 129—FLYING

VOLUME 1

PART 1 : AIRCRAFT AND ENGINES

SECTION 3 : GAS TURBINES

CHAPTER 1 : BASIC THEORY AND PRINCIPLES

	<i>Paras.</i>
Introduction	1-5
Thrust and Propulsive Efficiency	6-23
Ram, Density, and Temperature Effects	24-28

CHAPTER 2 : COMPRESSORS

Introduction	1-4
Centrifugal Compressors	5-13
Axial Flow Compressors	14-20
Airflow through an Axial Compressor	21-25
Surging	26
Axial Compressor Surging	27-30
Variable Position Guide Vanes	31-32
Twin-Spool Engines	33
Icing of Compressors	34
Fouling of Compressors	35
Materials	36-38
Comparison of Axial Flow and Centrifugal Flow Compressor Engines	39-46
Compressorless Jets	47-49

CHAPTER 3 : TURBINES

Introduction	1
Types of Turbines	2
Impulse Turbines	3-7
Reaction Turbines	8-9
Power Absorption	10-12
Basic Requirements of a Turbine	13-16
Metallurgical Requirements	17
Creep Resistance	18-22
Rotor Disc	23
Nozzle Guide Vanes	24

RESTRICTED

	<i>Paras.</i>
Cooling and Sealing	25-26
Blade Manufacture	27
Rotor Construction	28-30

CHAPTER 4 : COMBUSTION SYSTEMS

Introduction	1
Types of Combustion Chambers	2-3
The Direct Flow Combustion Chamber	4-7
The Annular Combustion Chamber	8-10
Fuel Injection and Vaporization	11
Swirl Atomization	12-14
Types of Burners	15-20
Torch Igniters	21-22
High-Energy Ignition Units	23
Working of the High-Energy Igniter	24-25
Igniter Plug	26
Position of Igniter	27
Mixing the Air and Fuel	28-30
Combustion Process	31-32
Factors Affecting Flame Extinction... ..	33-34
Secondary and Tertiary Air	35
Combustion Efficiency	36-37
Vapour Combustion System... ..	38-41
Combustion Chamber and Burner Deposits	42
Flame Tube Materials	43

CHAPTER 5 : FUELS

Introduction	1-2
Calorific Value	3
Ignition Characteristics	4
Air/Fuel Ratios	5
Viscosity and Volatility	6
Flame Extinction	7
Flame Temperature	8
Flame Speed	9
Vapour Pressure	10-11
Reid Vapour Pressure	12

RESTRICTED

	<i>Paras.</i>
Fuel Boiling and Loss by Evaporation	13
Evaporative Losses	14
Methods of Reducing or Eliminating Fuel Losses	15-22
Aviation Turbine Fuels	23-25

CHAPTER 6 : FUEL SYSTEMS

Introduction	1
Requirements of a Fuel System	2-3
Methods of Controlling the Fuel Flow	4-8
Types of Fuel Systems	9
Pressure-Controlled Systems	10
Flow-Controlled Systems	11-12
Working of a Typical Fuel System	13-16
Methods of Controlling the Fuel Flow to the Throttle	17
Stopping the Engine	18

COMPONENTS OF FUEL SYSTEMS

Fuel Pumps	19-21
Overspeed Governor	22
Isolating Valve	23-24
Dual Pumps	25-26
Function of the Isolating Valve in Dual-Pump Systems	27-31
Barostat	32
Barometric Pressure Control (B.P.C.)	33-34
Acceleration Control Unit	35-36
Metering Valve Unit	37
Air/Fuel Ratio Control (A.F.C.)	38-39
Throttle Control	40
High-Pressure (H.P.) Cocks	41
Low-Pressure (L.P.) Cocks	42
Low-Pressure Filter	43
Minimum-Burner-Pressure Unit	44
Accumulator	45
Pressurizing Valve and Shut-Off Cock	46
Flow Distributor	47
Universal Fuel Governor	48

RESTRICTED

COMBINED CONTROL UNITS

Paras.

Simple Flow-Controlled Unit	49
Full-Range Flow-Controlled Units	50

DESCRIPTION OF A TYPICAL FUEL SYSTEM

Introduction	51-52
How the System Operates	53-58
Ground Running	59-60
In Flight	61
Idling at Altitude	62-64
Fuel Drain Systems	65-66
Typical Dual Pump Full-Range Flow Control	67

CHAPTER 7 : LUBRICATION AND COOLING SYSTEMS

Introduction	1
Tanks and Sumps	2-4
Gear-Type Oil Pumps	5-7
Micro-Pumps	8
Reduction Gear Lubrication...	9
Lubricating Oils	10-11
Air Cooling	12-17

CHAPTER 8 : JET PIPES, TEMPERATURE MEASUREMENT, AND TEMPERATURE CONTROL

JET PIPES

Introduction	1
Function	2-4
Variable Area Jet-Pipe Nozzles	5-8
Jet-Pipe Lagging	9
Materials	10

TEMPERATURE MEASUREMENT

Purpose...	11
Thermo-Couples	12
J.P.T. Indicators	13

TEMPERATURE CONTROL

Principles	14
Operation	15-18

RESTRICTED

CHAPTER 9 : THRUST AUGMENTATION

	<i>Paras.</i>
Introduction	1

REHEAT

Purpose and Advantages of Reheat	2-3
Description of a Reheat Unit	4-9

DESCRIPTION OF A TYPICAL INSTALLATION

Jet Pipe and Two-Position Nozzle	10-12
Cooling	13
Seals	14
Burners... ..	15-18
Igniter	19
Safety Devices	20-23
Reheat Control Unit	24-25
Reheat Fuel Pump	26-27

OPERATION OF REHEAT

Selection of Reheat	28-32
Cancelling Reheat	33

WATER/METHANOL INJECTION SYSTEMS

Principles	34-40
Description of a Typical System	41-42

COMPARISON BETWEEN WATER/METHANOL INJECTION AND REHEAT	43
---	----

CHAPTER 10 : TURBO-PROP ENGINES

Introduction	1
Types of Turbo-Prop Engines	2-6
Shaft Horse-Power (S.H.P.)	7
Advantages of the Turbo-Prop over the Turbo-Jet	8
Turbine Assemblies	9-10
Direct-Drive Turbines	11-14
Free-Shaft Turbines	15
Propeller Control	16-21
Engine Failure... ..	22-24
Propeller (C.S.U.) Failure	25-30
Engine Handling	31

RESTRICTED

	<i>Paras.</i>
Engine Power Curves	32
Torque Meters... ..	33-37
Propeller Brakes	38
Fuel Consumption	39-42
Power/Weight Ratio	43-45
Fuel Control of the Turbo-Prop Engine	46
Summary of Performance Characteristics—Basic Types of I.C. Engines	47-56

CHAPTER 11 : STARTING SYSTEMS

Introduction	1
---------------------	---

ELECTRIC STARTER

Principles	2-5
-------------------	-----

SINGLE-BREECH CARTRIDGE TURBO-STARTER

Description	6-9
Overspeed Device	10
Breech	11
Electrical Connections	12
Engagement Mechanism	13
Loading and Unloading	14
Firing	15
Precautions	16-20
Safety Disc Replacement	21

TRIPLE-BREECH CARTRIDGE TURBO-STARTER

Introduction	22
Starter System	23-24
Method of Ignition	25
Gas Flow	26
Description	27-36
Precautions	37-40
Use of the Starter Push-Button	41

ROTAX TURBO-STARTER (TYPE C.T. 0103)

Description	42-44
Operating Cycle	45-46

RESTRICTED

(A.L. 5, Dec. '55)

RESTRICTED

	<i>Paras.</i>
Gas Flow	47
Loading and Unloading	48-49
Precautions	50-52

CARTRIDGE TURBO-STARTER (TYPE C.T. 0201)

Description	53-56
Cartridges	57-63
Loading	64-67
Unloading	68
Firing	69
Precautions	70
Burst Safety Disc	71

COMPRESSED AIR STARTING SYSTEMS

Introduction	72
Air Starter Trolley	73
Turbo-Starter	74

LIQUID FUEL STARTING SYSTEMS

Introduction	75
Advantages of the Liquid Fuel System	76
Plessey Liquid Fuel Starter	77
B.T.H. Liquid Fuel Starter	78
Use of the Starters	79

CHAPTER 12 : ENGINE HANDLING

Introduction	1
---------------------	---

STARTING AND GROUND TESTING

Precautions	2-5
Turbo-Jet Engines	6-13
Failure to Start	14-19
After Starting	20
Testing the Engine	21-23
Turbo-Prop Engines	24
Starting by Compressed Air	25
Starting Double Engines by the Windmilling Method	26-29

RESTRICTED

	<i>Paras.</i>
Cartridge Starting	30
Failure to Start	31-33
Warming Up	34-35
Testing the Engine	36-39

TAXYING

Engine Considerations	40-44
------------------------------	-------

TAKE-OFF

Engine Considerations	45-47
Turbo-Prop Engines	48
Reheat for Take-Off	49

CLIMBING

Turbo-Jet Engines	50-52
Turbo-Prop Engines	53

GENERAL HANDLING CONSIDERATIONS

Principles	54
Centrifugal Compressor Engines	55
Axial-Flow Engines	56-62
Mechanical Failure in Flight	63
Reheat Failure in Flight	64
Reheat at Altitude	65
Turbo-Prop Aircraft	66-74

ENGINE ICING

Centrifugal and Axial Flow Engines	75-76
Effect of R.P.M. on Rate of Icing	77
Effect of T.A.S. on Rate of Icing	78-80
Warming Function of Airframe Icing	81
Indications of Rate of Icing	82-84
Effect of Speed on Indications of Icing	85-86
Avoiding or Clearing Icing Regions	87
Engine Anti-Icing Equipment	88-89
Engine Handling with Hot Air Anti-Icing Switched On	90
Variable Angle Swirl Vanes—Effect of Icing (No Anti-Icing Fitted)	91-95
Turbo-Prop Engines	96

RESTRICTED

(A.L. 5, Dec. '55)

RESTRICTED

APPROACH AND LANDING

	<i>Paras.</i>
Turbo-Jet Engines	97-98
Turbo-Prop Engines	99-101

STOPPING THE ENGINE

Turbo-Jet Engines	102
Turbo-Prop Engines	103

MANAGEMENT OF THE FUEL-PUMP ISOLATING SWITCH

During Take-Off	104
In Flight105-108
During Landing	109

RELIGHTING

Turbo-Jet Engines110-116
Turbo-Prop Engines117-121
Flame Extinction on Gas-Turbine Engines122-126
