

RESTRICTED

A.P. 129 : VOLUME 2 : PART 2

SECTION 4 : APPLIED FLYING

CHAPTER 1 : AIRFRAME LIMITATIONS

	<i>Paras.</i>
Introduction	1-2
Considerations when Imposing I.A.S. Limitations	3-5
Considerations when Imposing Mach Number Limitations	6-9
Considerations when Imposing <i>g</i> Limitations	10-14
The Use of Anti- <i>g</i> Suits	15
Aircraft Limitations Expressed as a Manoeuvre Zone (Flight) Envelope... ..	16-20
Limitations on High-Altitude Aircraft	21
Limitations when Flying in Turbulent Conditions	22
Prohibited Manoeuvres... ..	23-24
Spinning... ..	25
Inverted Flying	26
Aerobatics	27
Undercarriage and Flap Limiting Speeds	28
Weight Limitations	29-31
C.G. Limitations	32-35
Exceeding Limitations	36

CHAPTER 2 : INSTRUMENT FLYING

Introduction	1-3
Cockpit Checks... ..	4-5

PITCH CONTROL IN LEVEL FLIGHT

Considerations	6-9
Artificial Horizon	10-13
Altimeter	14-15
Rate of Climb and Descent Indicator (R.C.D.I.)	16-20
Airspeed Indicator	21-22
Trim	23-27
Cross-Checking... ..	28-32

DIRECTIONAL AND LATERAL CONTROL

Considerations	33-34
Artificial Horizon	35-36
Gyro Compass	37
Turn and Slip Indicator	38-41
Trim	42
Cross-Checking... ..	43-45

RESTRICTED

THE EFFECT OF POWER ON STRAIGHT AND LEVEL FLIGHT

	<i>Paras.</i>
Power and I.A.S.	46-47
Power, Altitude, and I.A.S.	48-50
Increasing the I.A.S.	51-52
Reducing the I.A.S.	53-54
General Considerations	55

URNS

The Standard Rate Turn	56
Entering the Turn	57-58
Leaving the Turn	59
Steep Turns	60-61

CLIMBING

Introduction	62
Entering a Climb from Climbing Airspeed	63
Entering a Climb from an Airspeed Higher than Climbing Airspeed	64
Levelling-Off from a Climb	65-66

DESCENDING

Introduction	67-69
Entering a Descent from Level Flight at Descending Airspeed	70
Entering a Descent from an Airspeed Higher than Descending Airspeed	71
Levelling-Off from a Descent	72

INSTRUMENT TAKE-OFF

Introduction	73
Cockpit Check	74
Take-Off Technique	75-78

GOING ROUND AGAIN

Technique	79
------------------	----

RECOVERY FROM UNUSUAL ATTITUDES

Considerations	80-84
Attitudes Characterized by an Increasing I.A.S.	85-91
Attitudes Characterized by a Decreasing I.A.S.	92-95

SPINNING AND RECOVERY

Considerations	96
Instrument Indications when Spinning	97
Recovery Technique	98-101

RESTRICTED

RESTRICTED

INSTRUMENT FLYING AFTER ENGINE FAILURE

	<i>Paras.</i>
Considerations	102
Suction-Driven Instruments on Single-Engine Aircraft	103
Electrically-Driven Instruments on Single-Engine Aircraft	104

CHANGING FROM INSTRUMENT TO VISUAL FLIGHT AND VICE VERSA

Introduction	105
Visual to Instrument Flight	106
Instrument to Visual Flight	107-108

INSTRUMENT APPROACHES

Information Given in Pilot's Notes... ..	109
Approaching	110-111
Variations of the Recommended Power Setting	112
Landing	113

CHAPTER 3 : NIGHT FLYING

Introduction	1-2
Night-Flying Briefing	3
Pre-Flight Checks	4
Knowledge of the Cockpit	5
Engine Starting	6
Taxying	7
Take-Off and Climb	8
Engine Failure After Take-Off	9
Circuit Flying	10
Approach Lighting	11-15
Landing	16-17
Overshoot Procedure	18
Pilot Navigation at Night	19

EMERGENCIES

Runway Obstructed	21
Failure of Navigation Lights	22
Use of the Signal Pistol by Night	23-24
Procedure when No Signal Pistol is Available	25-26
Other Emergencies	27

CHAPTER 4 : FLYING AT HIGH SPEED AND HIGH ALTITUDE

Introduction	1-3
Aircraft Limitations	4
Effects of High Speed and Altitude on Aircraft Performance	5-9
Variation of Compressibility Characteristics with Altitude	10

(A.L. 4, Mar. 58)

RESTRICTED

	<i>Paras.</i>
Use of Trimmers	11-12
Control at Low Speed	13
Manoeuvring at High Altitude	14-17
Climbing... ..	18-20
Recovery from Dives at High I.A.S.	21-25
I.A.S. <i>versus</i> I.M.N. in a Dive	26-29
Use of Airbrakes	30
The Total-Energy Concept	31-39
Practical Limitations and Considerations when Using Total-Energy Principles	40-44
Effects of Icing	45-46
Instrument Flying	47
Lookout	48
Physiological Considerations	49
Safety Equipment	50-52
▶ Effect of Shock Waves on Nearby Aircraft	53-54 ◀

CHAPTER 5 : AEROBATICS

Purpose	1
Regulations	2
Airmanship	3
Engine Handling	4
Vertical Attitudes	5

BASIC AEROBATICS

Recommended Speeds	6
Loop	7-8
Slow Roll	9-10
Stall Turn	11-12
Barrel Roll	13-14

FURTHER AEROBATICS

Introduction	15
Half Roll off the Top of a Loop	16
Half Roll	17
Upward or Vertical Roll	18
Aileron Turn	19
Derry Turn	20
Inverted Flight	21-22
Vertical Figure Eight	23
Horizontal Figure Eight	24
Hesitation Rolls	25

CHAPTER 6 : LOW FLYING

Introduction	1-3
Regulations	4-5

(A.L. 4, Mar. 58)

RESTRICTED

	<i>Paras.</i>
Flight Planning	6-10
Speed	11-12
Height	13-15
Effect of Wind	16-17
Turning Radius... ..	18-19
Turbulence	20
Use of Flaps	21-22
Flying Over the Sea	23
Flying Over Snow	24
Radio Aids	25
High-Speed Low Flying	26-28
Lookout	29

CHAPTER 7 : FLYING IN TURBULENCE AND PRECIPITATION

Significance of Turbulence	1
Effect of Speed	2-5
Use of the Controls	6-7
Types of Turbulence	8

THUNDERSTORMS

Considerations	9-10
Detection by Radar	11
Hail	12
Icing	13
Lightning	14-17
Flight Planning	18-19

PRECIPITATION

General	20
Rain	21-28
Hail	29-31
Snow and Sleet	32

CHAPTER 8 : FLYING IN TROPICAL CONDITIONS

Introduction	1-2
Difficulties Encountered in the Tropics	3-11
Aircraft and Engine Handling	12-29
Navigation in Tropical Regions	30-36
Radio under Tropical Conditions	37-38
Care of Personnel	39-42

CHAPTER 9 : FLYING IN ARCTIC CONDITIONS

Introduction	1
---------------------	---

RESTRICTED

RESTRICTED

GENERAL INFORMATION

Land Areas	Paras.
Water Areas	2-4
	5

CLIMATE AND WEATHER

General	6-10
Precipitation	11
Surface Winds	12
Surface Temperature	13
Wind Chill Factor	14-17
Upper Winds and Temperatures	18-19
Cloud	20-21
Visibility and Fog	22-23
Ice Formation	24-26

SPECIAL ARCTIC PHENOMENA

Sea Smoke Fog	27
Ice Fog	28
Aurora	29
Contrails... ..	30
Refraction	31

AIRCRAFT PREPARATION FOR FLIGHTS TO THE ARCTIC

Introduction	32
Airframes	33
Piston Engines and Power Plants	34
Gas-Turbine Engines	35
Special Equipment	36

AIRCRAFT HANDLING

Introduction	37
Taxying and Run-Up	38-39
Take-Off... ..	40
In Flight... ..	41-42
Approach and Landing	43-44

SERVICING AND GROUND CHECKS

Introduction	45
Pre-Flight Procedures	46-48
Post-Flight Procedures... ..	49
Servicing in General	50
Servicing of Equipment	51

RESTRICTED

RESTRICTED

NAVIGATION

	<i>Paras.</i>
Introduction	52
Definition of Direction	53
Compass Performance	54-58
Flight Illumination	59
Navigation Aids	60-64
Flight Planning	65-66

RADIO

General	67
Frequency Creep	68
Limitations of Equipment	69

THE HUMAN PROBLEM

Morale	70
Food and Drink	71
Clothing	72-73
Frost-Bite	74-76
Care of Eyes and Skin	77
Working in the Open	78

CHAPTER 10 : FORMATION FLYING

Introduction	1-2
Leadership	3-4

BASIC CLOSE FORMATIONS

The Pair	5
Section Formations	6-11
Flight Formations	12
Squadron Formations	13-14

CLOSE FORMATION FLYING TECHNIQUE—BASIC CONSIDERATIONS

Relative Speeds... ..	15-17
Joining Formation	18-21
Positions in Basic Formations	22-25
Keeping Station—Straight and Level Flight	26-30
Keeping Station—Turns	31-34
Night Formation	35-37

FORMATION TAKE-OFF

General	38
Stacking on the Runway	39
Take-Off... ..	40
Interval Between Pairs	41
Slipstream During Take-Off	42

RESTRICTED

FORMATION LANDING

General	Paras.
General	43-44
Technique and Procedure	45-48

LANDING A LARGE FORMATION

In the Circuit	49
The Break, and Stream Landing	50-53

CHANGING CLOSE FORMATION

General	54
Intercommunication	55-56
Lookout during Formation Changing	57
Section Formation Changing	58-62
Flight and Squadron Formation Changing	63-67

BATTLE FORMATION

Purpose	68
The Pair	69
Fluid Four	70
Fluid Six... ..	71
Squadron Battle Formation	72-73
Cross-Over Turns	74
Turnabouts	75
Defensive Breaks	76
High Altitude Jet Formation	77
Anticipating the Leader's Movements	78
Radio Calls and Hand Signals	79

CHAPTER 11 : TARGET TOWING

Introduction	1-3
---------------------	-----

TARGETS AND EQUIPMENT

Types of Target... ..	4-12
Towing Cable	13
Aircraft Towing Attachment	14-17

OPERATING PROCEDURE

Authorization of Flights	18
Runway Length... ..	19-20
Methods of Taking Off with a Target	21-25
Instructions for Towing-Pilots	26-32

GENERAL INSTRUCTIONS

Manœuvres and Weather Limitations	33-35
Range Orders	36
Damaged Gliders	37
Landing the Target	38-50

RESTRICTED

RESTRICTED

EMERGENCIES

	<i>Paras.</i>
Engine Failure	51-52
Fuel Shortage	53-54
Failure to Release	55-57
R/T Failure	58

CHAPTER 12 : BASIC HELICOPTER FLYING TECHNIQUES

Introduction	1
Control of Power and r.p.m.	2-4
Control in Hovering Flight	5-7
Take-off and Landing	8-10
Take-off and Landing Out-of-Wind	11-17
Landing on Sloping Ground	18-21
Running Take-off and Landing	22-25

TAXYING

Introduction	26
Use of Controls... ..	27-28
Special Precautions	29-30

SIDEWAYS AND BACKWARD FLIGHT

Introduction	31
Aircraft Characteristics	32
Control Movements and Disc Stability	33-34
Speed Limitation	35-36
Turning on the Spot	37
Transitions	38-41

OTHER CONSIDERATIONS

Circuit Patterns... ..	42-44
Overpitching	45-46
Vortex Ring State	47-49
Ground Resonance	50-52
Engine Failure	53-59
Flying at Maximum All-up Weight	60-61
Centre of Gravity Position	62-64
Flying at High Altitude	65-67
Flying in Tropical Conditions	68
Instrument Flight	69-71
Night Flying	72
Starting and Stopping the Rotor	73-77
Icing	78-81
Overcontrolling with the Cyclic Pitch	82-84

RESTRICTED

CHAPTER 13 : CARRIER OPERATIONS

	<i>Paras.</i>
The Aircraft Carrier	1-3
Flight Deck	4-9
Hangar	10-13
Preparing to Fly	14-16
Flying-Off	17-22
Landing-On	23-29
Sea Rescue	30

CHAPTER 14 : PILOT NAVIGATION

Introduction	1-2
The Pilot Navigator's Problem	3-6

STANDARD REQUIRED

Practical Limits Required	7-8
Effect of Inaccuracies	9

FLIGHT PLANNING

Introduction	10-12
Ideal Flight Procedure	13-14
Pilot Navigation Log Card (Form 4255)	15
Preparation of Maps	16-19
Planning Sequence	20

AIRCRAFT PERFORMANCE

Recommended Speeds and Engine Settings	21
Best Climbing Speeds	22
Time to Altitude	23
Descending Speed	24
Calculations of True Air Speed	25-26
Changes from I.C.A.N. Conditions	27

MENTAL DEAD RECKONING

Definition of Mental D.R.	28
Use of Drift Lines	29-30
The One-in-Sixty Rule	31-33
Estimation of Wind Effect	34
True Air Speed Calculation	35-36
Calculations for the Climb	37-38
Estimation of Distance	39
Estimation of Direction	40
Estimation of Time of Flight	41-42
Amendments to Time or Speed of Flight	43-48
Dog-Leg Procedures	49-52

RESTRICTED

MAP ANALYSIS

General	53
Feature Analysis	54
General Location	55
Relief	56
Coastline and Water Features	57
Agricultural and Built-up Areas	58-59
Communications	60
Special Features	61

MAP READING

General	62
Direction	63
Distance	64
Anticipation of Landmarks	65
Check Features and Priority Selection	66
Fixing by Map Reading	67
Map Reading in Clear Weather	68-69
Map Reading in Cloudy Conditions	70-73

USE OF RADIO AIDS

Introduction	74-75
V.H.F. D/F	76-78
Position Fixing, using V.H.F. D/F	79-82
Tunable Beam Approach (T.B.A.)	83-86
Voice Rotating Beacon	87-88

LOW-LEVEL PILOT NAVIGATION

General Review... ..	89-90
Selection of Maps	91-93
Planning the Low-Level Sortie	94-101
Map Reading	102-106
Feature Tracking	107-108

HIGH-LEVEL PILOT NAVIGATION

Introduction	109
Selection of Maps and Charts	110
Selection of Ground Features... ..	111
High-Altitude Navigation Technique	112
Map Reading	113-117

CONSIDERATIONS OF HIGH-SPEED NAVIGATION

Principal Considerations	118-124
---------------------------------	---------

RESTRICTED

RESTRICTED

PROCEDURE WHEN UNCERTAIN OF POSITION

	<i>Paras.</i>
Introduction	125-126
No V.H.F. Contact Available... ..	127-129
Lost, No Visual Contact Established Without Going Below Safety Altitude	130
Lost, in Visual Contact with Ground, and Likely to Remain in Contact	131-132

CHAPTER 15 : SEARCH AND RESCUE ORGANIZATION

Introduction	1-4
Basis of Operations	5
Search and Rescue Aircraft	6
Rescue Craft	7
Land Rescue	8
Signals Organization	9-10
Rescue Appointments	11

DISTRESS PROCEDURE

General Considerations	12
Action by Ground Organizations	13-22
Aircraft Search Procedure	23
Action on Locating Survivors... ..	24
Action by Aircraft Sighting Distressed Aircraft	25
