## FOREWORD

1. AP3279 is issued to assist airmen in the trade of Aircraft Technician Propulsion undertaking courses of formal and specialist training.
2. The notes contained in the book do not include detailed servicing instructions, but provide information concerned with the basic principles of the trade.
3. The subject matter of AP3279 may be affected from time to time by the contents of Defence Council Instructions and other official publications. Under such circumstances, appropriate amendment action will be taken as soon as possible. In the meantime, the most recent official document is to be taken as the overriding authority.
4. Since the contents of the publication are designed to suit the training needs in both formal and specialist training courses, some of its contents may not apply to courses of training undertaken at schools of technical training. In such cases, the material content is not examinable at the schools. The examinable material for each trade will be found in the relevant trade specification (AP3376A Series).
5. No reproduction of the contents of the book, in whole or in part, may be made without prior permission being obtained from Headquarters RAF Support Command. Additionally, no unauthorized alterations are to be made to its contents. Errors in, or omissions from the text, should be reported to Headquarters RAF Support Command (Publications and Reprographics) on MOD Form 765, through normal Service channels.

SECRET

Faint, illegible text, possibly bleed-through from the reverse side of the page.

# INDEX TO CHAPTERS

## SECTION 1—PISTON ENGINES

Chapter 1	Piston Engine Principles
Chapter 2	Piston Engine Construction
Chapter 3	Supercharger and Float Type Carburetors
Chapter 4	Fuel Injection Carburetors
Chapter 5	Piston Engine Lubrication Systems
Chapter 6	Piston Engine Cooling Systems
Chapter 7	Magnetos and Auxiliary Devices
Chapter 8	Ignition Harness and Sparking Plugs
Chapter 9	Piston Engine Starters

## SECTION 2—GAS TURBINE ENGINES

Chapter 1	An Introduction to Gas Turbine Engines
Chapter 2	Turbine Engine Construction
Chapter 3	Introduction to Gas Turbine Engine Fuel Systems
Chapter 4	Gas Turbine Engine Fuel Systems
Chapter 5	Gas Turbine Engine Lubrication Systems
Chapter 6	Air Cooling and Sealing Systems
Chapter 7	Gas Turbine Engine Starting Systems
Chapter 8	Thrust Augmentation

## SECTION 3—ELEMENTARY AIRFRAMES

Chapter 1	Major Components
Chapter 2	Elementary Principles of Flight
Chapter 3	Airframe Construction
Chapter 4	Principles of Hydraulics and Pneumatics

## SECTION 4—PETROLEUM PRODUCTS

Chapter 1	Fuels
Chapter 2	Lubricating Oils

Chapter 3	Greases
Chapter 4	Petroleum Derivatives

### SECTION 5—AIRCRAFT PROPELLERS AND ASSOCIATED COMPONENTS

Chapter 1	The Aircraft Propeller
Chapter 2	(Not allocated)
Chapter 3	Propellers for Turbo-Propeller Aircraft
*Chapter 4	Propeller Governor Units and Feathering Pumps
*Chapter 5	Servicing and the Repair of Propellers
*Chapter 6	Propeller De-icing Systems

### SECTION 6—AIRCRAFT FUEL SYSTEMS AND COMPONENTS

Chapter 1	Aircraft Fuel Systems
Chapter 2	Fuel System Components
Chapter 3	Aircraft Fuel Tanks (Construction—Installation—Precautions)
Chapter 4	Aircraft Fuel Tanks (Repair—Testing—Packing)

\*To be issued later
