FOREWORD

1. These notes are issued to assist airmen under training as mechanics and fitters in the General Engineering Trade Group. They are not intended to form a complete textbook but are to be used, as required, in conjunction with lessons and demonstrations given at schools of technical training. They may also be used to assist airmen on continuation training at other RAF stations.
2. The notes are based on the appropriate syllabuses of training, and deal with the basic theory and applied principles in a general way. They do not cover specific details or servicing instructions of equipment in use in the RAF. Such details are to be found in the official Air Publication for the equipment and this should always be consulted during the servicing of the equipment.
3. No alteration to these notes may be made without the authority of official Amendment Lists.
4. Readers of this publication are asked to report any unsatisfactory features which they may notice. Such unsatisfactory features may include factual errors in words or illustrations; ambiguous, obscure or conflicting information; and omissions. All such unsatisfactory features should be reported to Headquarters Training Command (Ed T 2c) in the form set out in AP113A, Section 1, Chapter 1, paragraph 8.

CONTENTS

Section 1	..	..	..	..	Basic Knowledge
Section 2	..	..	..	..	Workshop Practices
Section 3	..	..	..	..	Machine Shop Practice
Section 4	..	..	..	..	Metal Work
Section 5	..	..	..	..	Internal Combustion Engine
Section 6	..	..	..	..	Electrics
Section 7	..	..	..	..	Ground Equipment
Section 8	..	..	..	..	Refrigeration
Section 9	..	..	..	..	Gas Turbines

Note: Each divider card lists the section contents by chapters; a breakdown into paragraphs is given at the beginning of each chapter.
