

KEY DIAGRAM OF RIB AND FRAME POSITIONS

11. **COMPILATION OF TEXT**

The multi-indentation system has been used in which the main assemblies, sub-assemblies, groups and detail items indicate their relationship by the indentation of the descriptive titles. This indentation is in accordance with the following outline:—

- (a) Main assembly, sub-assemblies, separate groups and detail parts of the main assembly start at the left-hand margin. The main assembly is distinguished by bold capital type from the remainder.
- (b) First division: sub-sub-assemblies, groups or detail parts of the major breakdown listed in the preceding paragraph are indented one space.
- (c) Second division: groups or items are indented one further space.
- (d) Third and subsequent divisions: in sequence.

12. **MAIN ASSEMBLY DRAWINGS**

Where for description or identification purposes only a Main Assembly drawing is shown, that drawing number is shown in brackets at the end of the description.

13. **PIPE LINES AND FLEXIBLE CABLES**

Local manufacture of these items is intended wherever possible. Charts showing the various materials and parts required are included as appendices at the end of the schedule.

14. **AMENDMENT LISTS**

Amendments are to be correctly inserted and entered in the Amendment Certificate which is to be found in front of the schedule. Manuscript amendments are to be made in ink.

Amendment Lists are numbered consecutively and will be issued at regular intervals. This schedule is to be checked with the statement of Amendment Lists issued, which is published periodically by A.M.O.s.

15. **SERIAL NUMBER**

This schedule is Serial Numbered and is to be accounted for in accordance with A.M.O. A.772/47.

16. **ASSOCIATED PUBLICATIONS**

The following associated Schedules of Spare Parts for Airframe Accessory Equipment are to be used in conjunction with this schedule:—

A.P. 4515, Vol. 3, Part 1  
B, C, E, F, R and S

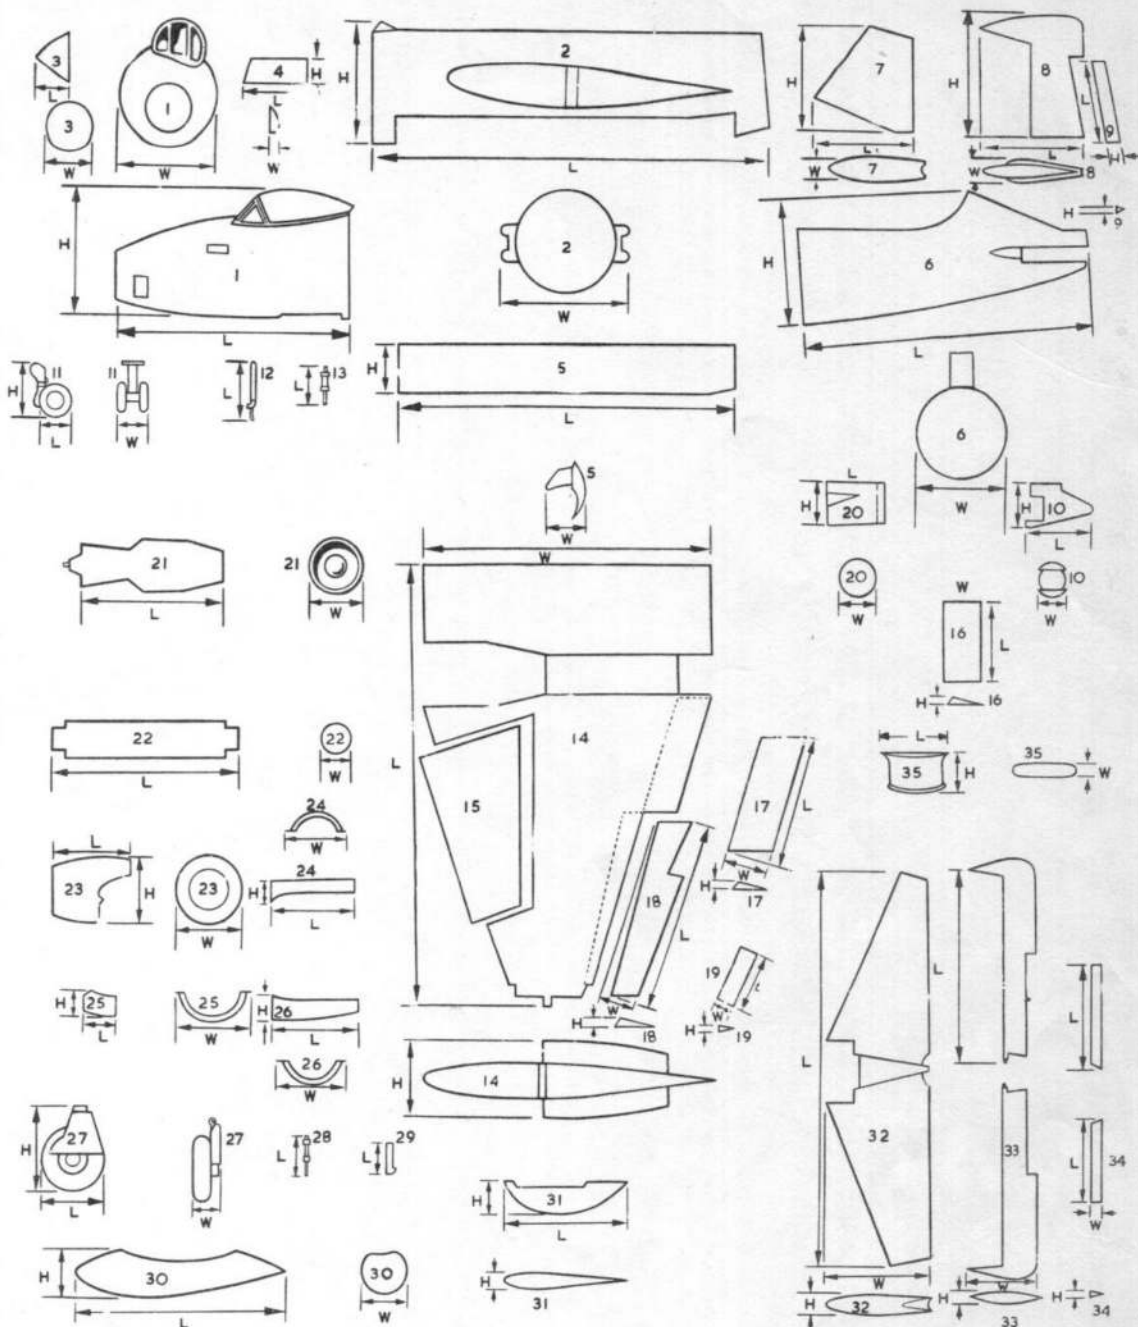

17. **CLASSIFICATION OF EQUIPMENT**

The letters denoting the Class of Store are defined as follows:—

**CLASS "A"**—Class "A" items are those items of equipment which remain on charge and cannot be replaced except on return to store. Repairable items which are beyond the capacity or authority of the unit to repair are to be returned to the appropriate Maintenance Unit categorised R/D.

**CLASS "B"**—Class "B" items are those items of equipment which remain on charge and cannot be replaced except on return to store. Items which are beyond the capacity of the unit to repair, or which for technical reasons are not capable of being repaired whatever the defect are to be disposed of locally by units.

**CLASS "C"**—Class "C" items are items of equipment other than Class "A" or "B" which are consumable in use, or are incapable of being economically repaired and are not of a nature which would necessitate detailed accounting as Class "A" or "B" equipment.
