

HYDRAULIC CRIMPING TOOL KIT (PLESSEY)

Ref. No. 3A/3304
Dimensions 14 in. × 12 in. × 6½ in.
Weight 31 lb.
Associated publication A.P.4343S, Vol. 1, Sect. 15, Chap. 14

BRIEF DESCRIPTION

The Plessey 14-ton hydraulic crimping unit is a self-contained portable tool designed for use with the whole range of Pren and Prenal cables.

The complete kit is housed in a carrying case and consists of a foot-operated hydraulic pump, connected to the crimping head by a high-pressure flexible hose, and a set of cable dies. The dies are stamped to show their cable sizes and are stowed in a rack in the bottom of the carrying case. The hinged lid of the rack bears markings on its inner surface to indicate the location of the various dies. Two small containers supplied with the equipment contain oil for replenishing the hydraulic system and an approved inhibitor for use when crimping aluminium cables respectively.
