

## R.P. CIRCUIT TESTER, TYPE B

Ref. No. ... .. 5G/310

Associated publication A.P.4343S, Vol. 1, Sect. 15, Chap. 4

### BRIEF DESCRIPTION

The R.P. circuit tester, Type B, was developed for use on 24-volt aircraft R.P. installations fitted with weak-link adaptors, to test the supply sockets for continuity.

The tester comprises a set of eight test lamps each of which is screwed into a M.E.S. lampholder connected to a weak-link plug contained within a moulded rubber body. A translucent cover protects the lamp and is secured to the body of the tester by a recessed rim which fits into a lipped seating in the moulded rubber.
