

NOTE TO READERS

The subject matter of this publication may be affected by Air Ministry Orders or by "General Orders and Modifications" leaflets in this A.P., in the associated publications listed below or even in some others. If possible, Amendment Lists are issued to correct this publication accordingly, but it is not always practicable to do so. When an Order or leaflet contradicts any portion of this publication, the Order or leaflet is to be taken as the overriding authority.

The inclusion of references to items of equipment does not constitute authority for demanding the items.

Each leaf bears the date of issue and, when applicable, the number of the Amendment List with which it was issued. New or amended technical information on new leaves which are inserted when this publication is amended will be indicated by solid triangles positioned in the text. The triangles are placed thus ◀ . . . ▶ to show the extent of amended text and thus ▶◀ to show where text has been deleted. The triangles merely denote a change and are not a mark of emphasis. When a Section or Chapter is issued in a completely revised form, the triangles will not appear.
