A.P.4347F,G,J,K & R Vol 4/5
Pt 1 Bk 2 Sect 1 (1st Ed)

1. Mountings and Trays. Mountings and trays are to be examined whenever the equipment they support is removed.
2. U.H.F. Pressurization
 - a. Care is to be taken to ensure that units are not pressurized in excess of 5 p.s.i.
 - b. 5 p.s.i. at ground level is equal to 20 p.s.i. at approx 60000 feet, therefore excess pressure at ground level will lead to a corresponding increase at altitude and subsequent risk of explosion.
3. U.H.F. T.R. Ensure power is Off before 42-way connector is connected to or disconnected from J.1401 on T.R. front panel.
4. T.S. 15077. Under conditions of radio silence the aircraft aerials are not to be connected to T.S. 15077 during functional test.
