

BONDING TESTER, TYPE B

Ref. No.	...	...	...	...	...	5G/2126
Dimensions	...	...	...	6½ in.	× 4½ in.	× 7 in.
Weight	...	...	...	...	...	5 lb
Associated publication	A.P.4343S, Vol. 1, Sect. 24, Chap. 11					

BRIEF DESCRIPTION

The bonding tester Type B is used for testing the bonding and screening connections in aircraft. The tester consists of a direct reading ohmmeter and a 1·2-volts alkaline battery enclosed in separate compartments in a hardwood or plastic case. Two test leads, one 6 ft. and the other 60 ft. in length, each fitted with test spikes, are connected to the tester by 3-pole plugs. The ohmmeter scale is calibrated from 0 to 0·1 ohm and has fifty divisions, each ten being engraved with numerals.
