

CHAPTER 1

ELECTRICAL SYSTEM

LIST OF GROUPS

	<u>Group</u>
GENERAL INFORMATION	A
POWER SUPPLY SERVICES	B
ENGINE SERVICES	C
FLYING SERVICES	D
INSTRUMENT SERVICES	E
LIGHTING SERVICES	F
ARMAMENT SERVICES	G
RADIO SERVICES	H

NOTE...

A list of services appears on the title page of each group.

Introduction

This chapter contains descriptive and servicing information on the electrical system installed in this aircraft. The chapter is divided into a number of self-contained groups of information beginning with a general information group covering the system as a whole and embodying system wiring details, identification and general servicing of the components. Illustrations showing the removal of the major junction boxes and panels, together with a master index of all the components employed in the system and illustrations showing the location and access to

the equipment are also included in this group. The remaining groups are arranged according to their function, being referenced by the group letter and a number together with code letters of the circuit concerned as given in the list of services on the title page of each group. Each group is complete with a list of contents and embodies a description of the circuit or circuits concerned, together with routing and theoretical diagrams and the necessary servicing information, which includes testing in-situ and the removal of the equipment where required.
